

FROM THE SPACE

Jagriti Hinduja

Content writer, Earth Root Foundation

Warning! The earth is warming.

From the space, the earth is a beautiful place
But inside it's dying at a fast pace
It cries
Cries every day, every second
To gain back that old grace

From the space, earth is one,
No Division
But inside, the division, the politics
Are not caring about climate change

From the space, earth is the only planet
To have intelligent life
But the truth is
Earth is rife
With non-rational people
Who pretend to be oblivious to
The serious situation of climate change

It's never too late to mend
We can still start today
Give our earth some time to heal
Give it one more chance
To have that ecstatic feel

Let me teach you how to do
The first step is to speak through
Talk to your friends and family
Use social media to reveal the reality

Search for ways and
Make those ways a part of your routine
And watch the earth go green

And the last step is
To be a part of an environmental organization
Like the EARTH ROOT FOUNDATION
And contribute a little to work on a massive operation.
